1. Identification

Product identifier: Steel Deck (Painted and Unpainted)

Other means of identification: Not available.

Recommended use: Roof deck, sub floor deck.

Recommended restrictions: None known.

Manufacturer / Importer / Supplier / Distributor information

Manufacturer/Supplier: New Millennium Building Systems

6115 County Road 42, Butler, IN 46721

Telephone: 260-868-6000

100 Diuguids Lane, Salem, VA 24153

540-389-0211

1992 NW Bascom Norris Drive, Lake City, FL 32055

Telephone: 386-466-1300

3565 US Highway 32 North, Hope, AR 71801

Telephone: 870-722-4100

Contact Person: Safety Department

Emergency: (800)-424-9300

2. Hazard(s) identification

Physical hazards: Not classified.

Health hazards: Not classified.

OSHA defined hazards: Not classified.

Label elements

Hazard symbol: None.

Signal word: None.

Hazard statement: None.

Precautionary statement

Prevention: Avoid creating dust.

Response: Wash skin with soap and water.

Storage: Store away from incompatible materials.

Disposal: Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC): Not classified.

Supplemental information

Hazard statement: In its manufactured and shipped state, this product is considered non-hazardous. Processing may generate hazardous fumes and dusts. Welding, cutting and metalizing can generate ozone. Ozone can cause irritation of eyes, nose and respiratory tract.

3. Composition/information on ingredients

Steel Deck (Painted and Unpainted) SDS US
913675 Version #: 01 Revision date: - Issue date: 23-August-2013
Vanadium 7440-62-2 0-0.2
Iron oxide** 1309-37-1 0
Vanadium pentoxide** 1314-62-1 0

The product is an alloy. The alloy surface is coated. May liberate hazardous oxides such as iron oxides and vanadium pentoxide at temperatures above the melting point.

**Composition comments**
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.
Coating may contain chromium in the range of 1.5-2 mg of chromium/sq foot or 10-15 mg of chromium/sq foot depending on the treatment.
**Iron oxide and vanadium pentoxide are formed at temperatures above the melting point.

4. First-aid measures

**Inhalation**
In case of inhalation of dusts or fumes from heated product: Move into fresh air and keep at rest. Get medical attention if symptoms persist. If breathing is difficult, give oxygen. If breathing stops, provide artificial respiration.

**Skin contact**
Wash skin with soap and water. In case of burns with hot metal, rinse with plenty of cold water. If burns are severe, consult a physician. If skin irritation or an allergic skin reaction develops, get medical attention.

**Eye contact**
Any material that contacts the eye should be washed out immediately with water. If easy to do, remove contact lenses. Get medical attention promptly if symptoms persist or occur after washing.

**Ingestion**
Solid steel: Not applicable. Dust: Get medical attention if any discomfort continues.

**Most important symptoms/effects, acute and delayed**
Exposed individuals may experience eye tearing, redness, and discomfort. May dry the skin leading to discomfort and dermatitis. Prolonged contact may cause redness, irritation and cracking. High concentrations of freshly formed fumes/dusts of metal oxides can produce symptoms of metal fume fever. Typical symptoms last 12 to 48 hours and are characterized by metallic taste in the mouth, dryness, and irritation of the throat, followed by weakness, muscle pain, fever, and chills.

5. Fire-fighting measures

**Suitable extinguishing media**
No unusual fire or explosion hazards noted. Use fire-extinguishing media appropriate for surrounding materials.

**Unsuitable extinguishing media**
None known.

**Specific hazards arising from the chemical**
By heating and fire, toxic vapors/gases may be formed.

**Special protective equipment and precautions for firefighters**
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

**Fire-fighting equipment/instructions**
Use standard firefighting procedures and consider the hazards of other involved materials.

6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures**
Cold solid metal: No special precautions are necessary beyond normal good hygiene practices. See Section 8 of the MSDS for additional personal protection advice when handling this product. Hot metal: Avoid contact with hot material. Wear protective clothing as described in Section 8 of this safety data sheet.

**Methods and materials for containment and cleaning up**
In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

**Collect for recycling.**

**Environmental precautions**
No specific precautions.

7. Handling and storage

**Precautions for safe handling**
Avoid contact with sharp edges and hot surfaces. Use appropriate gloves and tools to ensure safe handling. Use work methods which minimize dust/fume production. Observe safety measures suited to the coating(s) when handling, cutting or melting. Do not breathe fumes and dusts. Follow the recommendations in ANSI Z49.1, Safety in welding and cutting (ANSI=American National Standard Institute). Observe good industrial hygiene practices.

**Conditions for safe storage, including any incompatibilities**
Store in a dry place. Store away from: Oxidizing agents. Acids.
8. Exposure controls/personal protection

Occupational exposure limits

### Biological limit values

No biological exposure limits noted for the ingredient(s).

### Exposure guidelines

**Iron oxide and vanadium pentoxide are formed at temperatures above the melting point.**

### Appropriate engineering controls

 Adequate ventilation should be provided so that exposure limits are not exceeded. Use local exhaust when welding, burning, sawing, brazing, grinding or machining to prevent excessive dust or fume exposure.

### Individual protection measures, such as personal protective equipment

**Eye/face protection**

Use of safety glasses or goggles is required for welding, burning, sawing, brazing, grinding or machining operations. In addition to safety glasses or goggles, a welding helmet with appropriate shaded shield is required during welding, burning, or brazing. A face shield is recommended, in addition to safety glasses or goggles, during sawing, grinding, or machining.

**Skin protection**

**Hand protection**

Wear protective gloves.

**Other**

Wear suitable protective clothing.
Respiratory protection
Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits.

Thermal hazards
When material is heated, wear gloves to protect against thermal burns. Thermally protective apron and long sleeves are recommended when volume of hot material is significant.

General hygiene considerations
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Observe any medical surveillance requirements.

9. Physical and chemical properties

Appearance
Solid.

Physical state
Solid.

Form
Solid.

Color
White/Gray (painted) Metallic gray (unpainted).

Odor
None.

Odor threshold
Not applicable.

pH
Not applicable.

Melting point/freezing point
2750 °F (1510 °C) / Not applicable.

Initial boiling point and boiling range
Not applicable.

Flash point
Not applicable.

Evaporation rate
Not applicable.

Flammability (solid, gas)
Not available.

Upper/lower flammability or explosive limits
Flammability limit - lower (%)
Not applicable.

Flammability limit - upper (%)
Not applicable.

Explosive limit - lower (%)
Not applicable.

Explosive limit - upper (%)
Not applicable.

Vapor pressure
Not applicable.

Vapor density
Not applicable.

Relative density
7 - 8

Solubility(ies)
Not applicable.

Partition coefficient (n-octanol/water)
Not applicable.

Auto-ignition temperature
Not applicable.

Decomposition temperature
Not applicable.

Viscosity
Not applicable.

10. Stability and reactivity

Reactivity
Stable at normal conditions.

Chemical stability
This product is stable under expected conditions of use.

Possibility of hazardous reactions
Will not occur.

Conditions to avoid
Contact with incompatible materials.

Incompatible materials
Strong acids. Oxidizing agents.

Hazardous decomposition products

11. Toxicological information

Information on likely routes of exposure
Ingestion
Solid steel: Not relevant, due to the form of the product. However, ingestion of dusts generated during working operations may cause nausea and vomiting.

Inhalation
No inhalation hazard under normal conditions. Welding, burning, sawing, brazing, grinding or machining operations may generate fumes and dusts of metal oxides.
Skin contact

Under normal conditions of intended use, this material does not pose a risk to health. Dust may irritate skin. Skin contact may aggravate an existing dermatitis. Contact with hot material can cause thermal burns which may result in permanent damage.

Eye contact

Under normal conditions of intended use, this material does not pose a risk to health. Contact with hot material can cause thermal burns which may result in permanent damage. Grinding and sanding this product may generate dust. Dust may irritate the eyes.

Symptoms related to the physical, chemical and toxicological characteristics

Exposed individuals may experience eye tearing, redness, and discomfort. May dry the skin leading to discomfort and dermatitis. Prolonged contact may cause redness, irritation and cracking. High concentrations of freshly formed fumes/dusts of metal oxides can produce symptoms of metal fume fever. Typical symptoms last 12 to 48 hours and are characterized by metallic taste in the mouth, dryness, irritation of the throat, followed by weakness, muscle pain, fever, and chills.

Information on toxicological effects

Acute toxicity

Processing may generate hazardous fumes and dusts. High concentrations of dust may irritate throat and respiratory system and cause coughing. Welding, cutting and metalizing can generate ozone. Ozone can cause irritation of eyes, nose and respiratory tract.

</tbody>
</table>

Serious eye damage/eye irritation

Dust may irritate the eyes.

Respiratory sensitization

Not relevant, due to the form of the product. Contains nickel: May cause allergy or asthma symptoms or breathing difficulties if inhaled. This ingredient is bound within the product and release is not expected under normal condition.

Skin sensitization

Contains nickel: May cause an allergic skin reaction.

Germ cell mutagenicity

Not relevant, due to the form of the product. May liberate hazardous vanadium pentoxide at temperatures above the melting point. Vanadium pentoxide is classified as suspected of causing genetic defects. This ingredient is bound within the product and release is not expected under normal condition.

Carcinogenicity

Not relevant, due to the form of the product. May liberate hazardous oxides such as iron oxides and vanadium pentoxide at temperatures above the melting point. Inhalation of high concentrations of iron oxide may possibly enhance the risk of lung cancer development in workers exposed to pulmonary carcinogens. A residual chrome VI compound from the surface coating is water soluble and is carcinogenic. Chromium VI compounds are regarded as human carcinogens by IARC, NTP, OSHA and ACGIH. Vanadium pentoxide is classified as possibly carcinogenic to humans (Group 2B) by IARC. This ingredient is bound within the product and release is not expected under normal condition.

IARC Monographs. Overall Evaluation of Carcinogenicity

| Chromium (CAS 7440-47-3) | 3 Not classifiable as to carcinogenicity to humans. |
| Iron oxide** (CAS 1309-37-1) | 3 Not classifiable as to carcinogenicity to humans. |
| Nickel (CAS 7440-02-0) | 2B Possibly carcinogenic to humans. |
| Vanadium pentoxide** (CAS 1314-62-1) | 2B Possibly carcinogenic to humans. |

NTP Report on Carcinogens

Nickel (CAS 7440-02-0) | Known To Be Human Carcinogen. Reasonably Anticipated to be a Human Carcinogen.

Reproductive toxicity

Not relevant, due to the form of the product. May liberate hazardous vanadium pentoxide at temperatures above the melting point. Vanadium pentoxide is classified as suspected of damaging fertility or the unborn child. This ingredient is bound within the product and release is not expected under normal condition.

Specific target organ toxicity - single exposure

No data available.

Specific target organ toxicity - repeated exposure

Not relevant, due to the form of the product. Contains Manganese: Causes damage to organs (lung) through prolonged or repeated exposure by inhalation. This ingredient is bound within the product and release is not expected under normal condition.
Aspiration hazard
Due to the physical form of the product it is not an aspiration hazard.

Chronic effects
Frequent inhalation of dust over a long period of time increases the risk of developing asthma, chronic lung diseases, and skin irritation. Chronic inhalation of high concentrations of iron oxide fumes or dust may lead to benign pneumoconiosis (siderosis). Exposure to manganese fume/dust can affect the central nervous system (apathy, drowsiness, weakness and other chronic symptoms such as postural tremors). Pre-existing skin and respiratory conditions including dermatitis, asthma and chronic lung disease might be aggravated by exposure. The ingredients of the alloy are bound within the product and release is not expected under normal conditions.

12. Ecological information

Ecotoxicity
The environmental hazard of the product is considered to be limited.

Persistence and degradability
No data available.

Bioaccumulative potential
No data available on bioaccumulation.

Mobility in soil
Not relevant, due to the form of the product.

Other adverse effects
None known.

13. Disposal considerations

Disposal instructions
Dispose waste and residues in accordance with applicable federal, state, and local regulations.

Hazardous waste code
Not regulated.

Waste from residues / unused products
Disposal recommendations are based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal. Recover and recycle, if practical.

Contaminated packaging
Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14. Transport information

DOT
Not regulated as a hazardous material by DOT.

IATA
Not regulated as a dangerous good.

IMDG
Not regulated as a dangerous good.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not applicable.

15. Regulatory information
