

Safety Data Sheets (SDS)

### **Section 1 – Identification**

1(a) Product Identifier used on Label: Gold Scrap 1(b) Other means of identification: SDS ID: NFE-0110

1(c) Recommended use of the chemical and restrictions on use: Scrap metal use. None Known

1(d) Name, address, and telephone number:

OmniSource Corporation Phone: (800) 666-4789 (Safety Department)

7575 West Jefferson Blvd Fort Wayne, Indiana 46804

1(e) Emergency Phone Number: (800) 424-9300 (CCN# 221258) CHEMTREC

### Section 2 – Hazard(s) Identification

**2(a)** Classification of the chemical: Gold Scrap is considered an article under Reach regulation (REACH REGULATION (EC) No 1907/2006) and is not subject to classification under CLP regulation (REGULATION (EC) No 1272/2008). However, Gold Scrap is not exempt as an article under OSHA's Hazard Communication Standard (29 CFR 1910.1200) due to its downstream use, thus this product is considered a mixture and a hazardous material. Therefore, the categories of Health Hazards as defined in "GLOBALLY HARMONIZED SYSTEM OF CLASSIFICATION AND LABELING OF CHEMICALS (GHS), Third revised edition ST/SG/AC.10/30/Rev. 3" United Nations, New York and Geneva, 2009 have been evaluated. Refer to Section 3, 8 and 11 for additional information.

2(b) Signal word, hazard statement(s), symbols and precautionary statement(s):

Hazard Symbol	Hazard Classification	Signal Word	Hazard Statement(s)
	Carcinogenicity - 2 Reproductive Toxicity - 1A Single Target Organ Toxicity (STOT) Repeat Exposure -1	DANGER	Suspected of causing cancer.  May damage fertility or the unborn child.  Causes damage to lungs and central nervous system through prolonged or repeated inhalation exposure.

#### **Precautionary Statement(s):**

Prevention	Response	Storage/Disposal
Do not breathe dusts or fumes.		
Wear protective gloves / protective clothing / eye protection / face protection.		Diagram of contents in
Wash thoroughly after handling.	If exposed, concerned or feel unwell: Get	Dispose of contents in accordance with federal, state
Obtain special instructions before use.	medical advice/attention.	and local regulations.
Do not handle until all safety precautions have been read and understood.		8
Do not eat, drink or smoke when using this product.		

2(c) Hazards not otherwise classified: None Known

2(d) Unknown acute toxicity statement (mixture): None Known

### Section 3 – Composition/Information on Ingredients

3(a-c) Chemical name, common name (synonyms), CAS number and other identifiers, and concentration:

Chemical Name	CAS Number	EC Number	% weight
Copper	7440-50-8	231-159-6	varies
Silver	7440-22-4	231-131-3	varies
Platinum	7440-06-4	231-116-1	varies
Palladium	7440-05-3	231-115-6	varies
Lead	7439-92-1	231-100-4	varies
Gold	7440-57-5	231-165-9	varies

EC - European Community

CAS - Chemical Abstract Service

# Section 4 – First-aid Measures

4(a) Description of necessary measures: If exposed, concerned or feel unwell: Get medical advice/attention.

- Inhalation: Gold Scrap as sold/shipped is not a likely form of exposure.
- Eye Contact: Gold Scrap as sold/shipped is not a likely form of exposure.
- Skin Contact: Gold Scrap as sold/shipped is not a likely form of exposure.
- Ingestion: Gold Scrap as sold/shipped is not a likely form of exposure.

Safety Data Sheet (SDS)

Revision: 06/13/2018

#### **Section 4 – First-aid Measures**

#### 4(b) Most important symptoms/effects, acute and delayed (chronic):

- Inhalation: Gold Scrap as sold/shipped is not likely to present an acute or chronic health effect.
- Eye: Gold Scrap as sold/shipped is not likely to present an acute or chronic health effect.
- Skin: Gold Scrap as sold/shipped is not likely to present an acute or chronic health effect.
- Ingestion: Gold Scrap as sold/shipped is not likely to present an acute or chronic health effect.

However, during further processing (welding, grinding, burning, etc.) individual components may illicit an acute or chronic health effect. Refer to Section 11-Toxicological Information.

4(c) Immediate Medical Attention and Special Treatment: None Known

# **Section 5 – Fire-fighting Measures**

- 5(a) Suitable (and unsuitable) Extinguishing Media: Not Applicable for Gold Scrap as sold/shipped. Use extinguishers appropriate for surrounding materials.
- **5(b) Specific Hazards arising from the chemical:** Not Applicable for **Gold Scrap** as sold/shipped. When burned, toxic smoke, fume and vapor may be emitted.
- **5(c) Special protective equipment and precautions for fire-fighters:** Self-contained NIOSH approved respiratory protection and full protective clothing should be worn when fumes and/or smoke from fire are present. Heat and flames cause emittance of acrid smoke and fumes. Do not release runoff from fire control methods to sewers or waterways. Firefighters should wear full face-piece self-contained breathing apparatus and chemical protective clothing with thermal protection. Direct water stream will scatter and spread flames and, therefore, should not be used.

### Section 6 - Accidental Release Measures

- **6(a) Personal Precautions, Protective Equipment and Emergency Procedures:** Not Applicable for **Gold Scrap** as sold/shipped. For spills involving finely divided particles, clean-up personnel should be protected against contact with eyes and skin. If material is in a dry state, avoid inhalation of dust.
- **6(b) Methods and materials for containment and clean up:** Not Applicable for **Gold Scrap** as sold/shipped. Collect material in appropriate, labeled containers for recovery or disposal in accordance with federal, state, and local regulations. Follow applicable OSHA regulations (29 CFR 1910.120) and all other pertinent state and federal requirements.

### **Section 7 - Handling and Storage**

- 7(a) Precautions for safe handling: Not Applicable for Gold Scrap as sold/shipped, however further processing (welding, burning, grinding, etc.) with the potential for generating high concentrations of airborne particulates should be evaluated and controlled as necessary. Wear protective gloves / protective clothing / eye protection / face protection. Wash thoroughly after handling. In case of inadequate ventilation, wear respiratory protection. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Practice good housekeeping. Do not breathe breathing metal fumes and/or dust. Do not eat, drink or smoke when using this product. Cut resistant gloves and sleeves should be worn when working with steel products.
- 7(b) Conditions for safe storage, including any incompatibilities: Store away from acids and incompatible materials.

### **Section 8 - Exposure Controls / Personal Protection**

8(a) Occupational Exposure Limits (OELs): Gold Scrap as sold/shipped in its physical form does not present an inhalation, ingestion or contact hazard, nor would any of the following exposure data apply. However, operations such as burning, welding (high temperature), sawing, brazing, machining, grinding, etc may produce fumes and/or particulates. The following exposure limits are offered as reference for an experienced industrial hygienist to review:

industrial hygicilist to review.					
Ingredients	OSHA PEL <sup>1</sup>	ACGIH TLV <sup>2</sup>	NIOSH REL <sup>3</sup>	IDLH <sup>4</sup>	
Copper	0.1 mg/m³ (as fume, Cu)	0.1 mg/m³ (as fume)	1.0 mg/m³ (as dusts & mists)	100 mg Cu/m <sup>3</sup>	
	1.0 mg/m³ (as dusts & mists, Cu)	1.0 mg/m³ (as dusts & mists, Cu)			
Silver	0.01 mg/m³	0.1 mg/m³ (dust or fume)	0.01 mg/m <sup>3</sup>	$10 \text{ mg/m}^3$	
Platinum	NE	1.0 mg/m <sup>3</sup>	1 mg/m <sup>3</sup>	NE	
Palladium	NE	NE	NE	NE	
Lead	0.05 mg/m <sup>3 5</sup>	0.05 mg/m <sup>3</sup>	0.05 mg/m <sup>3 6</sup>	100 mg/m <sup>3</sup>	
	"AL" 0.03 mg/m <sup>3</sup>				
Gold	NE	NE	NE	NE	

#### NE - None Established

<sup>1.</sup> OSHA Permissible Exposure Limits (PELs) are 8-hour TWA (time-weighted average) concentrations unless otherwise noted. A (C) designation denotes a ceiling limit, which should not be exceeded during any part of the working exposure unless otherwise noted. A Peak is defined as the acceptable maximum peak for a maximum duration above the ceiling concentration for an eight-hour shift. A skin notation refers to the potential significant contribution to the overall exposure by the cutaneous route, either by contact with vapors or, of probable greater significance, by direct skin contact with the substance. A Short Term Exposure Limit (STEL) is defined as a 15-minute exposure, which should not be exceeded at any time during a workday. An Action level (AL) is used by OSHA and NIOSH to express a health or physical hazard. They indicate the level of a harmful or toxic substance/activity, which requires medical surveillance, increased industrial hygiene monitoring, or biological monitoring. Action Levels are generally set at one half of the PEL but the actual level may vary from standard to standard. The intent is to identify a level at which the vast majority of randomly sampled exposures will be below the PEL.

# OmniSource The Best in Metals Recycling

# **Gold Scrap**

Safety Data Sheet (SDS) Revision: 06/13/2018

# Section 8 - Exposure Controls / Personal Protection (continued)

#### 8(a) Occupational Exposure Limits (OELs) (continued):

- 2. Threshold Limit Values (TLV) established by the American Conference of Governmental Industrial Hygienists (ACGIH) are 8-hour TWA concentrations unless otherwise noted. A Short Term Exposure Limit (STEL) is defined as the maximum concentration to which workers can be exposed for a short period of time (15 minutes) for only four times throughout the day with at least one hour between exposures. A "skin" notation refers to the potential significant contribution to the overall exposure by the cutaneous route, either by contact with vapors or, of probable greater significance, by direct skin contact with the substance. ACGIH-TLVs are only recommended guidelines based upon consensus agreement of the membership of the ACGIH. As such, the ACGIH TLVs are for guideline use purposes and are not legal regulatory standards for compliance purposes. The TLVs are designed for use by individuals trained in the discipline of industrial hygiene relative to the evaluation of exposure to various chemical or biological substances and physical agents that may be found in the workplace.
- 3. The National Institute for Occupational Safety and Health Recommended Exposure Limits (NIOSH-REL) Compendium of Policy and Statements. NIOSH, Cincinnati, OH (1992). NIOSH is the federal agency designated to conduct research relative to occupational safety and health. As is the case with ACGIH TLVs, NIOSH RELs are for guideline purposes only and as such are not legal, regulatory limits for compliance purposes.
- 4. The "immediately dangerous to life or health air concentration values (IDLHs)" are used by NIOSH as part of the respirator selection criteria and were first developed in the mid-1970's by NIOSH. The Documentation for Immediately Dangerous to Life or Health Concentrations (IDLHs) is a compilation of the rationale and sources of information used by NIOSH during the original determination of 387 IDLHs and their subsequent review and revision in 1994.
- 5. OSHA considers "Lead" to mean metallic lead, all inorganic lead compounds (lead oxides and lead salts), and a class of organic compounds called soaps; all other lead compounds are excluded from this definition. The OSHA PEL and other OSHA requirements can be found in 29 CFR 1910.1025. The OSHA PEL (8-hour TWA) for lead in "non-ferrous foundries with less than 20 employees" is 0.075 mg/m<sup>3</sup>.
- 6. NIOSH considers "Lead" to mean metallic lead, lead oxides, and lead salts (including organic salts such as lead soaps but excluding lead arsenate). The NIOSH REL for lead (10-hour TWA) is 0.05 mg/m³; air concentrations should be maintained so that worker blood lead remains less than 0.060 mg Pb/100 g of whole blood.

#### 8(c) Individual Protection Measures:

• Respiratory Protection: Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, use only a NIOSH-approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. Concentration in air of the various contaminants determines the extent of respiratory protection needed. Half-face, negative-pressure, air-purifying respirator equipped with P100 filter is acceptable for concentrations up to 10 times the exposure limit. Full-face, negative-pressure, air-purifying respirator equipped with P100 filter is acceptable for concentrations up to 50 times the exposure limit. Protection by air-purifying negative-pressure and powered air respirators is limited. Use a positive-pressure-demand, full-face, supplied air respirator or self-contained breathing apparatus (SCBA) for concentrations above 50 times the exposure limit. If exposure is above the IDLH (Immediately dangerous to life or health) for any of the constituents, or there is a possibility of an uncontrolled release or exposure levels are unknown, then use a positive-demand, full-face, supplied air respirator with escape bottle or SCBA.

Warning! Air-purifying respirators both negative-pressure, and powered-air do not protect workers in oxygen-deficient atmospheres.

- Eyes: Wear appropriate eye protection to prevent eye contact. For operations which result in elevating the temperature of the product to or above its melting point or result in the generation of airborne particulates, use safety glasses to prevent eye contact. Contact lenses should not be worn where industrial exposures to this material are likely. Use safety glasses or goggles as required for welding, burning, sawing, brazing, grinding or machining operations.
- Skin: Wear appropriate personal protective clothing to prevent skin contact. Cut resistant gloves and sleeves should be worn when working with steel products. For operations which result in elevating the temperature of the product to or above its melting point or result in the generation of airborne particulates, use protective clothing, and gloves to prevent skin contact. Protective gloves should be worn as required for welding, burning or handling operations. Contaminated work clothing must not be allowed out of the workplace.
- Other protective equipment: An eyewash fountain and deluge shower should be readily available in the work area.

### **Section 9 - Physical and Chemical Properties**

9(a) Appearance (physical state, color, etc.): Depends upon scrap

composition, most often appears as a soft yellow ductile

9(b) Odor: Odorless

9(c) Odor Threshold: NA

9(d) pH: NA

**9(e) Melting Point/Freezing Point:** 2000 °F (1100 °C)

9(f) Initial Boiling Point and Boiling Range: 5100 °F (2800 °C)

9(g) Flash Point: NA

9(h) Evaporation Rate: NA

9(i) Flammability (solid, gas): Non-flammable, non-combustible

NA - Not Applicable

ND - Not Determined for product as a whole

9(j) Upper/lower Flammability or Explosive Limits: NA

9(k) Vapor Pressure: ND

9(l) Vapor Density (Air = 1): NA

9(m) Relative Density: 19 SG

**9(n) Solubility(ies):** Water Insoluble

9(o) Partition Coefficient n-octanol/water: ND

9(p) Auto-ignition Temperature: NA 9(q) Decomposition Temperature: ND

9(r) Viscosity: NA

### Section 10 - Stability and Reactivity

10(a) Reactivity: Not Determined (ND) for product in a solid form. Do not use water on molten metal.

10(b) Chemical Stability: Steel products are stable under normal storage and handling conditions.

10(c) Possibility of hazardous reaction: None Known

10(d) Conditions to Avoid: Storage with strong acids or calcium hypochlorite.

Safety Data Sheet (SDS)

Revision: 06/13/2018

## Section 10 - Stability and Reactivity (continued)

10(e) Incompatible Materials: Will react with strong acids to form hydrogen. Iron oxide dusts in contact with calcium hypochlorite evolve oxygen and may cause an explosion.

**10(f) Hazardous Decomposition Products:** Thermal oxidative decomposition of steel products can produce fumes containing oxides of iron and manganese as well as other alloying elements.

### **Section 11 - Toxicological Information**

11 Information on toxicological effects: The following toxicity data has been determined for Gold Scrap when further processed using the information available for its components applied to the guidance on the preparation of an SDS under the GHS requirements of OSHA and the EU CPL:

Hazard Classification	Hazard Category		Hazard Signal Word	Hazard Statement		
	EU	OSHA	Symbols	~- <b>g</b>	TIMEM W SWIVEHICH	
Carcinogenicity (covers Categories 1A, 1B and 2)	NA*	2 <sup>g</sup>		Warning	Suspected of causing cancer.	
Toxic Reproduction (covers Categories 1A, 1B and 2)	NA*	1 <sup>h</sup>		Danger	May damage fertility or the unborn child.	
STOT following Repeated Exposure (covers Categories 1 and 2)	NA*	1 <sup>j</sup>		Danger	Causes damage to lungs and central nervous system through prolonged or repeated inhalation exposure.	

<sup>\*</sup> Not Applicable - Semi-formed steel products are considered articles under Reach regulation (REACH REGULATION (EC) No 1907/2006) and are not subject to classification under CLP regulation (REGULATION (EC) No 1272/2008).

Toxicological data listed below are presented regardless to classification criteria. Individual hazard classification categories where the toxicological information has met or exceeded a classification criteria threshold are listed above.

- a. No LC<sub>50</sub> or LD<sub>50</sub> has been established for Gold Scrap. The following data has been determined for the components:
  - Copper: Rat  $LD_{50} = 481$  mg/kg (REACH) Rat  $LD_{50} > 2500$  mg/kg (REACH)
  - $\bullet \quad \textbf{Lead Oxide:} \ \text{Rat LD}_{50} \geq 2000 \ \text{mg/kg (REACH) (Oral)}, \ \text{Rat LC}_{50} \geq 5.05 \ \text{mg/L (REACH) No data (IUCLID) (Inhalation)}$
- b. No Skin (Dermal) Irritation data available for **Gold Scrap** as a mixture or its components.
- c. No Eye Irritation data available for Gold Scrap as a mixture or its components.
- d. No Skin (Dermal)/respiratory Sensitization data available for Gold Scrap as a mixture or its components.
- e. No Respiratory Sensitization data available for Gold Scrap as a mixture or its components.
- f. No Germ Cell Mutagenicity data available for **Gold Scrap** as a mixture or its components.
- g. Carcinogenicity: IARC, NTP, and OSHA do not list **Gold Scrap** as carcinogens. The following Carcinogenicity information was found for the components:
  - Welding Fumes IARC Group 2B carcinogen, a mixture that is possibly carcinogenic to humans.
  - Inorganic Lead Compounds IARC 2A, NTP 2
  - Lead: NTP-R, IARC 2B, EPA Probable human carcinogen and ACGIH A3
- h. No Toxic Reproduction data available for **Gold Scrap** as a mixture. The following Toxic Reproductive information was found for the components:
  - Lead: Male rats oral 60 day NOEL 250 mg/L. Effects on testes (lowest dose). Mouse Reproduction study effects at 0.5% only dose tested. Rat Teratology study LOEL 0.05% Birth weight, size and effects on testis. Reproductive, endocrine and growth effects have been reported.
  - Lead Oxide: Developmental tox study in rats Inhalation. Lead levels in blood indicative of lead poisoning.
- i. No Specific Target Organ Toxicity (STOT) following a Single Exposure data available for Gold Scrap as a mixture or its components.
- j. No Specific Target Organ Toxicity (STOT) following Repeated Exposure data was available for **Gold Scrap** as a mixture. The following STOT following Repeated Exposure data was found for the components:
  - Copper: Target organs affected Skin, eyes liver, kidneys and respiratory tract.
  - Lead: Rat Oral 6 mo NOEL 0.0015 mg/kg CNS Testes and Kidney Effects. Rat inhalation immunosuppression, Dermal percutaneous absorption.
  - Lead Oxide: Lead effect include CNS, Reproduction Development.

The above toxicity information was determined from available scientific sources to illustrate the prevailing posture of the scientific community. The scientific resources includes: The American Conference of Governmental Industrial Hygienist (ACGIH) Documentation of the Threshold Limit Values (TLVs) and Biological Exposure indices (BEIs) with Other Worldwide Occupational Exposure Values 2017, The International Agency for Research on Cancer (IARC), The National Toxicology Program (NTP) updated documentation, the World Health Organization (WHO) and other available resources, the International Uniform Chemical Information Database (IUCLID), European Union Risk Assessment Report (EU-RAR), Concise International Chemical Assessment Documents (CICAD), European Union Scientific Committee for Occupational Exposure Limits (EU-SCOEL), Agency for Toxic Substances and Disease Registry (ATSDR), Hazardous Substance Data Bank (HSDB), and International Programme on Chemical Safety (IPCS).

Safety Data Sheet (SDS) Revision: 06/13/2018

# **Section 11 - Toxicological Information (continued)**

The following health hazard information is provided regardless to classification criteria and is based on the individual component(s) and potential resultant components from further processing:

#### **Acute Effects:**

- Inhalation: Excessive exposure to high concentrations of metal dust may cause irritation to the eyes, skin and mucous membranes of the upper respiratory tract.
- Eye: Excessive exposure to high concentrations of metal dust may cause irritation to the eyes.
- Skin: Skin contact with metal dusts may cause irritation or sensitization, possibly leading to dermatitis. Skin contact with metallic fumes and dusts may cause physical abrasion.
- Ingestion: Ingestion of harmful amounts of this product as distributed is unlikely due to its solid insoluble form. Ingestion of metal dust may cause nausea or vomiting.

#### Acute Effects by component:

- Copper and copper oxides: Copper may cause allergic skin reaction. Copper oxide is harmful if swallowed, causes skin and eye irritation, and may cause an allergic skin reaction.
- Silver: Not Reported/ Not Classified
- Platinum: Not Reported/ Not Classified
- Palladium: Not Reported/ Not Classified
- Lead and lead oxides: Acute exposure to lead can be manifested as abdominal pain, nausea, constipation, anorexia, or vomiting; and, in severe cases coma or death.
- Gold: Not Reported/ Not Classified

### Delayed (chronic) Effects by component:

- Copper and copper oxides: Inhalation of high concentrations of freshly formed oxide fumes and dusts of copper can cause metal fume fever. Chronic inhalation of copper dust has caused, in animals, hemolysis of the red blood cells, deposition of hemofuscin in the liver and pancreas, injury to lung cells and gastrointestinal symptoms.
- Silver Long-continued use of silver and silver powders can lead to a form of poisoning known as ARGYRIA.
- Platinum: Not Reported/ Not Classified
- Palladium: Not Reported/ Not Classified
- Lead and lead oxides: Lead compounds can be toxic when ingested or inhaled. Lead is a cumulative poison. The predominant effects of excessive exposure are anemia, nervous system disorders, and kidney damage. Nervous system disorders may be displayed as irritability, headaches, insomnia, convulsions, muscular tremors, or palsy of the extremities. Excessive exposure can have adverse effects on human reproduction. Lead interferes with normal function of the adult and developing central nervous system in humans. Lead interferes with different enzyme systems. For this reason, many organs or organ systems are potential targets for lead. Lead can damage fertility or the unborn child.
- Gold: Not Reported/ Not Classified

### **Section 12 - Ecological Information**

12(a) Ecotoxicity (aquatic & terrestrial): No Data Available for Gold Scrap as sold/shipped. However, individual components of the product when processed have been found to be toxic to the environment. Metal dusts may migrate into soil and groundwater and be ingested by wildlife as

- Silver: EU RAR lists as Category 1 Very toxic to aquatic life with long lasting effects.
- 12(b) Persistence & Degradability: No Data Available for Gold Scrap as sold/shipped or individual components.
- 12(c) Bioaccumulative Potential: No Data Available for Gold Scrap as sold/shipped or individual components.
- 12(d) Mobility (in soil): No data available for Gold Scrap as sold/shipped. However, individual components of the product have been found to be absorbed by plants from soil.

12(e) Other adverse effects: None Known

**Additional Information:** 

Hazard Category: Category 1

**Hazard Symbol:** 

Signal Word: Warning

Hazard Statement: Very Toxic to aquatic life with long lasting effect

### **Section 13 - Disposal Considerations**

Disposal: Steel scrap should be recycled whenever possible. Product dusts and fumes from processing operations should also be recycled, or classified by a competent environmental professional and disposed of in accordance with applicable federal, state or local regulations.

Container Cleaning and Disposal: Follow applicable federal, state and local regulations. Observe safe handling precautions. European Waste Catalogue (EWC): 12-01-99 (wastes not otherwise specified), 16-03-04 (off specification batches and unused products), or 15-01-04 (metallic packaging).

Please note this information is for Gold Scrap in its original form. Any alterations can void this information.

Safety Data Sheet (SDS) Revision: 06/13/2018

# **Section 14 - Transport Information**

#### 14 (a-g) Transportation Information:

US Department of Transportation (DOT) under 49 CFR 172.101 does not regulate Gold Scrap as a hazardous material. All federal, state, and local laws and regulations that apply to the transport of this type of material must be adhered to.

### **Section 15 - Regulatory Information**

**Regulatory Information**: The following listing of regulations relating to a OmniSource Corporation may not be complete and should not be solely relied upon for all regulatory compliance responsibilities. This product and/or its constituents are subject to the following regulations:

**OSHA Regulations:** Air Contaminant (29 CFR 1910.1000, Table Z-1, Z-2, Z-3): The product, **Gold Scrap** as a mixture is not listed. However, individual components of the product are listed: Refer to Section 8, Exposure Controls and Personal Protection.

**EPA Regulations:** The product, **Gold Scrap** is not listed as a mixture. However, individual components of the product are listed:

Components	Regulations
Copper	CERCLA, CWA, SARA 313, TSCA, SDWA
Silver	CERCLA, CWA, SARA 313, TSCA
Lead	CERCLA, CWA, SARA 313, TSCA SDWA

SARA 311/312 Potential Hazard Categories: Immediate Acute Health Hazard; Delayed Chronic Health Hazard.

Section 313 Supplier Notification: The product, Brass Scrap contains the following toxic chemicals subject to the reporting requirements of section 313 of the Emergency Planning and Community Right-to-Know Act and 40 CFR part 372:

C	CAS#	Chemical Name	Percent by Weight
74	40-50-8	Copper	Varies
74	40-22-4	Silver	Varies
74	39-92-1	Lead	Varies

#### Regulations Key:

CAA Clean Air Act (42 USC Sec. 7412; 40 CFR Part 61 [As of: 8/18/06])

CERCLA Comprehensive Environmental Response, Compensation and Liability Act (42 USC Secs. 9601(14), 9603(a); 40 CFR Sec. 302.4, Table 302.4, Table 302.4 and App. A)

CWA Clean Water Act (33 USC Secs. 1311; 1314(b), (c), (e), (g); 136(b), (c); 137(b), (c) [as of 8/2/06])

RCRA Resource Conservation Recovery Act (42 USC Sec. 6921; 40 CFR Part 261 App VIII)

SARA Superfund Amendments and Reauthorization Act of 1986 Title III Section 302 Extremely Hazardous Substances (42 USC Secs. 11023, 13106; 40 CFR sec. 372.65) and Section 313 Toxic Chemicals (42 USC Secs. 11023, 13106; 40 CFR sec. 372.65 [as of 6/30/05])

TSCA Toxic Substance Control Act (15 U.S.C. s/s 2601 et seq. [1976])

SDWA Safe Drinking Water Act (42 U.S.C. s/s 300f et seq. [1974])

Safety Data Sheet (SDS)

# **Section 15 - Regulatory Information (continued)**

State Regulations: The product, Brass Scrap as a mixture is not listed in any state regulations. However, individual components of the product are listed in various state regulations:

Pennsylvania Right to Know: Contains regulated material in the following categories:

• Hazardous Substances: Copper, Silver, Platinum, Lead

• Environmental Hazards: Copper, Silver, Lead

• Special Hazardous Substance: None

California Prop 65 WARNING: This product can expose you to chemicals including lead and lead compounds, which is known to the State of California to cause cancer, and lead, which is known to the State of California to cause birth defects or other reproductive harm. For more information go to <a href="https://www.P65Warnings.ca.gov">www.P65Warnings.ca.gov</a>.

New Jersey: Contains regulated material in the following categories:

• Hazardous Substance: Copper, Silver, Platinum, Lead

Environmental Hazard: Copper, Silver, LeadSpecial Hazardous Substance: Platinum, Lead

Minnesota: Silver, Lead

Massachusetts: Copper compounds, Silver, Lead

#### Other Regulations:

WHMIS Classification (Canadian): The product, Gold Scrap is not listed as a mixture. However individual components are listed.

Ingredients	WHMIS Classification
Copper	Combustible Dusts - Category 1
Platinum	Combustible dusts
Lead	Carcinogenicity - Category 2; Reproductive toxicity - Category 1;
	Toxic to the reproductive function Toxic to the development Specific target organ toxicity - repeated exposure - Category 1

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the SDS contains all the information required by the Controlled Products Regulations.

### Hazardous Material Identification System (HMIS) Classification

Health Hazard	1
Fire Hazard	0
Physical Hazard	0

HEALTH= 1, Denotes possible chronic hazard if airborne dusts or fumes are generated Irritation or minor reversible injury possible.

FIRE= 0, Materials that will not burn.

PHYSICAL HAZARD= 0, Materials that are normally stable, even under fire conditions, and will not react with water, polymerize, decompose, condense, or self-react. Non-explosives.

### **National Fire Protection Association (NFPA)**

HEALTH = 1, Exposure could cause irritation but only minor residual injury even if no treatment is given.

Revision: 06/13/2018

FLAMMABILITY = 0, Materials that will not burn.

 $\label{eq:instable} INSTABILITY = 0, Normally stable, even under fire exposure conditions, and are not reactive with water.$ 

#### ABBREVIATIONS/ACRONYMS:

ACGIH	American Conference of Governmental Industrial Hygienists	
BEIs	Biological Exposure Indices	
CAS	Chemical Abstracts Service	
CERCLA	Comprehensive Environmental Response, Compensation, and Liability Act	
CFR	Code of Federal Regulations	
CNS	Central Nervous System	
GI, GIT	Gastro-Intestinal, Gastro-Intestinal Tract	
HMIS	Hazardous Materials Identification System	
IARC	International Agency for Research on Cancer	
LC50	Median Lethal Concentration	
LD50	Median Lethal Dose	
LD Lo	Lowest Dose to have killed animals or humans	

NIF	No Information Found		
NIOSH	National Institute for Occupational Safety and Health		
NTP	National Toxicology Program		
ORC	Organization Resources Counselors		
OSHA	Occupational Safety and Health Administration		
PEL	Permissible Exposure Limit		
PNOR	Particulate Not Otherwise Regulated		
PNOC	Particulate Not Otherwise Classified		
PPE	Personal Protective Equipment		
ppm	parts per million		
RCRA	Resource Conservation and Recovery Act		
RTECS	Registry of Toxic Effects of Chemical Substances		

Safety Data Sheet (SDS)

Revision: 06/13/2018

LEL	Lower Explosive Limit		SARA	Superfund Amendment and Reauthorization Act		
LOEL	Lowest Observed Effect Level		SCBA	Self-contained Breathing Apparatus		
	Section 16 - Other Information (continued)					
ABBRE	VIATIONS/ACRONYMS (continued):					
LOAEC	Lowest Observable Adverse Effect Concentration		SDS	Safety Data Sheet		
μg/m³	microgram per cubic meter of air		STEL	Short-term Exposure Limit		
mg/m³	milligram per cubic meter of air		TLV	Threshold Limit Value		
mppcf	million particles per cubic foot		TWA	Time-weighted Average		
	Mine Safety and Health Administration		UEL	Upper Explosive Limit		
MSHA	wifie Barety and Treatm 7 tallimistration
